# Two Finishes, Endless Possibilities

Composition® is the workhorse of acoustic wallcoverings, now available in both velour and smooth finishes to suit diverse design needs. The velour finish offers a soft, velvety texture with a durable, flexible surface ideal for vertical drops like wallpaper, while the smooth finish delivers a sleek, flat look as a high-performance alternative to paint and wallpaper. Both finishes expertly control interior acoustics and feature a pinnable, self-healing surface —making Composition the perfect canvas for creative and education-focused spaces.

visit [autexglobal.com](https://www.autexglobal.com)

#### Features and benefits

- Delivers excellent acoustic performance
- Pinnable, hook-and-loop receptive surface (Velour only)
- Customisable for limitless branding and design options through in-house cutting

#### Applications

- Decorative and functional acoustic wallcovering for education, retail and commercial interiors
- Minimise noise in interior environments
- Protective layer for plasterboard
- Alternative to paint and wallpaper
- Notice board for work, education, and creative spaces

**CARBON  
NEUTRAL**

We are  
proud to be a  
carbon neutral  
**organisation**

We have reduced and balanced all carbon emissions from our business operations, including manufacturing to zero.

We offer entirely  
carbon neutral  
**products**

All our products are carbon neutral with emissions offset through certified carbon credits.

**0**kg

CO<sub>2</sub>-e per kg of product

# Sustainability pillars

The five pillars of our sustainability strategy define all aspects of our operations and the products we offer.

01

**Climate change demands climate action** We are carbon neutral in everything we do.

02

**Closing the loop** We are advocates for closing the loop on waste. We design with circularity front of mind.

03

**Sustainable supply chain** We carefully select responsible suppliers and take action to mitigate unethical practices, and encourage good working conditions.

04

**Supporting wellbeing in buildings** All our products are made using only safe materials. No harmful chemicals are present in our products.

05

**Operating a business for purpose and profit** We strive to have a positive impact on our environment, our people, and the next generation.

In everything we do

# Our journey to carbon neutrality

1967      1990      2012      2017      2020      2021      2022

Founded in Auckland, NZ, creating underfelt for the flooring industry

Established on-line recycling

Reclaimed waste trimmings, **reducing raw material use and associated emissions**

First EPD's published and started measuring **greenhouse gas emissions**

Dematerialisation project which reduced raw material use **by 30% for core product**

We balanced all emissions from our **acoustic products to zero**

We balanced all emissions from our **global operations to zero**

- Australia
- New Zealand
- United States of America
- United Kingdom

# How we're fighting climate change

The climate crisis is the biggest issue of our generation. As a product designer and manufacturer, we have an opportunity to help improve the carbon impact of our industry.

## Our operational carbon emissions

We are a carbon neutral business. We actively monitor the carbon emissions of our entire operation to better understand our carbon footprint and how we can further reduce emissions. We have an internal strategy to reduce our carbon emissions and have successfully delivered a number of carbon reduction initiatives within our operations. Any carbon emissions that are currently unavoidable are offset through certified carbon credits. We have a commitment to purchase only verified carbon credits that are retired on robust registers to ensure we are driving positive change.

### Key business activities contributing to our operational emissions

## Embodied carbon of our products

Our products are carbon neutral, and we are the first business in our industry to include the cost of carbon in our products. We consider this an investment in present and future generations, and simply a cost of doing business. We calculate the embodied carbon of our products, from the raw material to the manufacturing gate, using industry recognised ISO standards. We have reduced the carbon footprint of our products through smart design and efficient manufacturing. While the embodied carbon of our products is low, they still do have a carbon impact. We mitigate this through our Carbon Neutral Product Initiative by offsetting the equivalent emissions using certified carbon credits. These carbon credits are generated from projects focused on renewable energy, fuel switching, and reforestation around the world.

### Key activities contributing to the embodied carbon of our products

# Credentials

## Certifying your green building

Autex Acoustics products meet criteria for WELL, LEED, Green Star, and BREEAM building rating systems, helping you achieve certification for your project. For support and guidance on available rating system points, please visit [autexglobal.com](http://autexglobal.com), or speak with your Autex Acoustics account manager.

### Environmental Product Declaration

An Environmental Product Declaration (EPD) is a document that communicates information about the life-cycle environmental impact of a product, including embodied carbon. Our EPDs are created and verified in accordance with ISO 14025 and EN 15804, used for construction products and services.

### GreenRate – Level A

GreenRate is a multi-attribute environmental certification that scores products on a range of environmental, health, and social measures. Autex Acoustics products are certified to achieve GreenRate Level A. Level A is the highest GreenRate level and demonstrates the highest level of product sustainability.

### Declare – International Living Future Institute

The ingredients in our products have been reviewed against the Living Future Challenge Red List and achieve a Third-Party Verified 'Red List Free' status.

Products achieve the highest 'LBC Red List Free' status when:

- Ingredients are 100% disclosed and are not found in the Red List
- Products are shown to meet VOC emissions limits

We assure the accuracy of our certifications by having our Declare labels independently verified by a third party expert.

### Health Product Declaration

A Health Product Declaration (HPD) is a document that reports the ingredients of a product and the health effects associated with these ingredients. A Health Product Declaration has been generated for each of our products.

### CDPH Standard

CDPH Standard Method (CA Section 01350) is a widely used standard to evaluate building products for low volatile organic chemicals (VOC) and formaldehyde emissions. All Autex Acoustics products meet the limits set by CDPH and the LEED building rating scheme.

### ISO Certifications

#### ISO 14001 – Environmental Management

Autex Acoustics manufactures under environmental management processes that are ISO certified. This certification gives assurance that we manage any environmental impacts within our operations.

#### ISO 9001 – Quality Management

Autex Acoustics has a strict quality management system that is ISO certified. Robust quality processes from raw material through to product release help ensure our products meet expectations.

#### ISO 45001 – Health and Safety Management

Autex Acoustics manufacturing operations have an ISO 45001 certified Health and Safety Management System to ensure the safety and wellbeing of our people.
