environmentally sustainable
office solutions

WALL TILES

3D ACOUSTIC WALL TILES

Dynamic, versatile and expressive. 14six8 3D acoustic wall tiles will offer functional dimensionality to any vertical surface no matter the size.

Our standard 597mm X 597mm tiles can be arranged and configured uniformly in a single direction, vertically or horizontally, in alternating directions or totally random to create expressive visual interest to your space.

Designed with parametric blades configured to form 3 dimensional organic shapes, sound is trapped, deflected and diffused between the individual blades maximising acoustic performance and enhancing visual impact.
