### Specifications

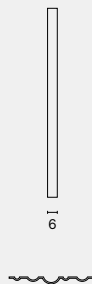

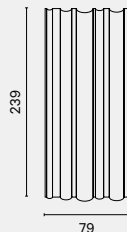

#### Weight

7 kg

#### Packaging

Carton box 245 x 80 x 15 cm  
Packed up to 6 panels per box

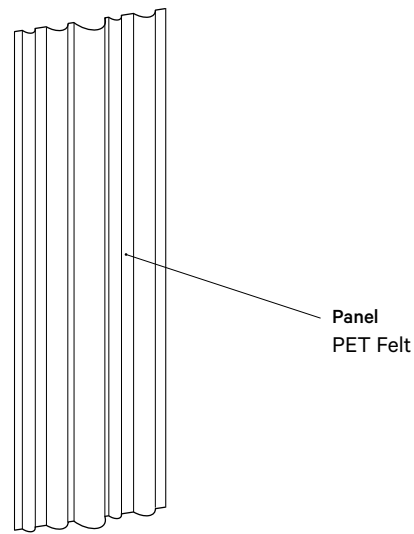

Packaging depends on the order quantity. Contact [sales@devorm.nl](mailto:sales@devorm.nl) for more information.

Mute Fit is a universal acoustic panel for commercial interiors. Its curtain-like pattern combines many different flat and curved sections. The pattern ensures that any piece cut out of the panel could have flat edges. In this way, the pieces of any width can be seamlessly connected with the rest of the installation. The panel is made from PET Felt - a sustainable porous material able to absorb noises. Mute Fit will serve both acoustic and aesthetic purpose in office, hospitality and public interiors. Available in eleven unique PET Felt blends and suitable for walls and custom installations.

Designed by **De Vorm**

### Product overview

### Sustainability goals at De Vorm

We strive to do more with less when creating a comfortable living and working environment. To fulfil this purpose, we are constantly looking for sustainable materials, local suppliers and partners sharing the same values. Ensuring that our products are recycled, durable and recyclable after a long lifespan.

#### PET Felt technology

PET Felt is made from recycled PET bottles. Cut into smaller flakes, plastic is turned into thin fibres that are intertwined together to form a layer of felt. Further, it is pressed into the shape of a final product with the heat. As a result, PET Felt material is soft to touch and sturdy enough to be used for chair shells and room dividers. PET Felt is UV-stabilised and offers sound-dampening properties due to its open-cellular structure.
